

CASUAL FLOW

Intent GUIDANCE

This course takes a more casual approach to guiding the learners through the modules. It is not required that they proceed in a specific sequence, but there is an implied flow to the module. It offers a detailed explanation of a novel assessment, and then encourages learners to share their creative approaches to this assessment.

- Module 3: Epidemiology (2 weeks)
 - Module 3 Tasks 1
 - Lesson 3 - Epidemiology -2 2
 - How to Make an Infographic 3
 - Public Health Surveillance
Mar 1 | 5 pts
 - Epidemiology of an Infectious Disease Paper
Mar 1 | 20 pts
 - Infectious Disease Infographic 4
Mar 1 | 10 pts
 - Post your Infographics! 5

1 Plan for the Two (2) Weeks

The Tasks page maps out the module's objectives, reading assignments, instructional content, and assessments.

2 Instructional Materials/Video & Commentary

In this page the instructor writes complementary content that expands and contextualizes the reading materials. Sometimes short videos are included.

3 Guide for Upcoming Novel Assignment

With a new style of assessment in this module, this page unpacks the instructor's expectations while offering a process guide for learners.

4 Novel Assignment

The assignment description and submission component of the previously mentioned novel assessment.

5 Collaborative Sharing of Work

This discussion forum provides opportunity for learners to share their creative works in an effort to inspire them and challenge their ideas on future assessments.
