# HEAVILY STRUCTURED
FOR GUIDED LEARNING

Intent
SEQUENCE

This course utilizes the "requirements" feature of Canvas modules to force the learners into a specific sequencing of the module activities. The learners can see all the module components, but access is only granted as they complete the requirements of each individual component in succession.

---

① **Heavily Structured for a Defined Sequence**

"View" is a requirement that learners click on and view the page before they can continue foward through the module content sequence.

② **Where We Are Going**

Organized around the chapters of the textbook, this section spells out the learning objectives for Chapter 6 and its associated activities.

③ **Quiz Over Reading, Before Lecture Videos**

This quiz of the reading must be completed before releasing the lecture videos. LockDown is a tool that tries to prevent internet browsing during use.

④ **Instructional Content**

By requiring the reading before the lecture video, this course assumes a basic understanding of course content and expands on that understanding.

⑤ **Homework Available Upon Completion of Everything Else**

The homework is dependent on completing all the module activities. When all the items are complete, the homework becomes available.
